

Excel or Google Sheets?

A SIMPLE GUIDE TO CHOOSING THE RIGHT TOOL FOR YOUR WORK

The Big Picture

Two different tools for two different types of jobs.

What are they for?

Excel: The Specialist

Think of Excel as a heavy-duty calculator. It's built for big, complex math and handling massive amounts of data all by yourself on your computer.

Sheets: The Socializer

Think of Sheets as a shared whiteboard. It's built for group projects and quick notes where everyone can write and chat at the same time.

Why choose Excel?

No Internet?

Works perfectly without WiFi.
Your files live on your computer,
so you can work anywhere.

Huge Space

Can hold millions of rows of
data without slowing down your
computer.

Advanced Art

Makes the most professional-
looking charts and graphs for
big business reports.

Why choose Sheets?

It's Free!

Anyone with a free Google account can use it. No expensive software to buy.

Auto-Save

It saves every single time you type a letter. You never have to click "Save" again.

Easy Sharing

Just send a link. No more emailing "v2_final_final.xlsx" back and forth.

Side-by-Side Comparison

Let's look at the practical details.

At a Glance

Feature	Microsoft Excel	Google Sheets
Cost	Monthly subscription or one-time buy	Completely Free
Internet	Doesn't need it to work	Needs it to work well
Group Work	A bit clunky for sharing	Best in the world
Math Power	Extremely Powerful	Great for basic & medium tasks

Which one wins?

Working Together

Sheets (Best)

Excel
(Okay)

Heavy Math Power

Excel (Best)

Sheets
(Good)

Excel is for the **Deep Thinker**. Sheets is for the **Fast Team**.

The Pro's Choice

If you are an accountant, a scientist, or someone dealing with huge amounts of sensitive data alone, Excel is your best friend. It has been the industry leader for over 30 years for a reason.

It stays fast even when your file has 100,000 names or numbers inside it.

The People's Choice

If you are planning a wedding with your partner, tracking a group project at school, or running a small business with a team, Google Sheets is unbeatable.

Because it lives in your web browser, you can access it from your phone, your work laptop, or your tablet without ever needing to install anything.

The "Wait, Really?" Numbers

17,000

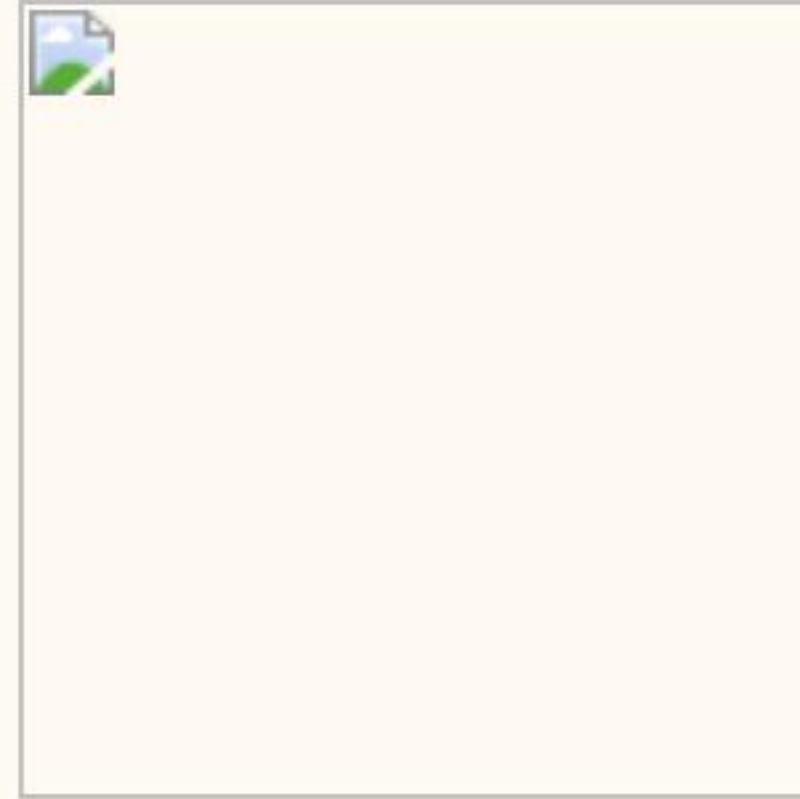

Sheets per User

Most users don't even use 1% of what these tools can actually do!

\$0

Cost for Sheets

For most regular people, the free version of Sheets is all they will ever need.

Any Questions?

THANK YOU FOR YOUR TIME! NOW GO OUT AND START CRUNCHING THOSE NUMBERS.
